A junior developer with a desire to become a good software engineer, seeking an organization that can provide a variety of opportunities and allow me to expand my knowledge and enhance my skills while working towards achieving the organizational goals.

EDUCATION

University of the Pacific

Jan. 2025 – Expected Dec. 2026

MS Computer Science — GPA: 3.76

Stockton, CA

University of Science, VNU-HCM

2018 – 2022

BS Information System

Vietnam

EXPERIENCE

UNICCS Co., Ltd

Nov. 2022 – Dec. 2024

Software Engineer

- Developed and optimized product features, improving system performance and SQL query efficiency.
- Designed and implemented application frameworks using Java and JavaScript.
- Worked with PostgreSQL and DB2, performing SQL tuning and database optimization.

FPT Telecom

Dec. 2021 – June 2022

Software Intern

- Built and optimized RESTful APIs for POP management dashboards.
- Developed interactive dashboards with React and data visualizations.
- Collaborated with backend and frontend teams to improve system monitoring.

SKILLS

Languages: Java, JavaScript, Python, C++, HTML, CSS, SQL

Frameworks: React.js, Node.js, Express, Next.js, Bootstrap

Databases: PostgreSQL, MySQL, MongoDB, DB2, SQL Server, Oracle

Tools: Git, GitHub, SVN, Jira, Trello

Concepts: Data Structures & Algorithms, OOP, RESTful APIs, Database Design

Soft Skills: Communication and team collaboration, problem-solving and critical thinking, time management and organization, adaptability and openness to feedback

PROJECTS

Web Taurus – Next Taurus

UNICCS Co., Ltd

- **Description:** Developing sales, inventory, and returns management systems for retail companies in Japan.
- **Technologies:** JavaScript, HTML, CSS, PostgreSQL, DB2, Java frameworks
- **Responsibilities:** Developed and maintained the product, coordinated with the team leader to design solutions meeting end-user requirements, and improved performance through SQL and feature optimization.

POP Management System

FPT Telecom

- **Description:** Built a dashboard to manage a telecom station system — statistics, POP status, infrastructure monitoring, and data visualization.
- **Technologies:** React.js, Next.js, Express, Node.js, MongoDB, Highcharts
- **Responsibilities:** Built RESTful APIs, implemented interfaces from design, and handled data visualization.

LLM-Powered Natural Language Query System for Healthcare

Course project

- **Description:** An end-to-end healthcare analytics system that lets users query structured medical data using natural language, auto-generating SQL queries, tables, and visualizations.
- **Technologies:** Python, BERT (bert-base-uncased), Streamlit, SQLite, Pandas, Matplotlib, Seaborn
- **Responsibilities:** Designed and trained an intent classification model, implemented rule-based NL-to-SQL generation, performed data preprocessing, built an interactive Streamlit dashboard, and integrated automated chart generation.
